DETAILED ACTION

Specification

1. Claim 2 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 3. Claims 1 and 3 are rejected under 35 U.S.C. 102(a) as being unpatentable by US Patent 6,222,512 to Tajima et al.

In reference to claim 1, Tajima teaches a driving method for a plasma display that creates gradations by selectively turning on or off a discharge cell during weighted sub-field periods (abstract). The number of light emissions to be allotted according to the weighting of the sub-field is different for an adjacent discharge cell (figures 24-26 and column 23, lines 38-51). Tajima shows in tables that the number of light emissions allotted to each discharge cell in a cell block is varied for each field (column 24, lines 53-55).

Application/Control Number: 09/883,448

Art Unit: 2675

In reference to claim 3 Tajima shows in figure 26 an embodiment where a cellblock includes four sub discharge cells. The light emissions sustain and erase patterns disclosed in the claims are known in the plasma art and exemplified in figure 8 by Tajima.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US Patent 6,333,766 to Kougami et al.

US Patent 6,091,396 to Minami et al.

US Patent 6,646,625 to Shigeta et al.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ming-Hun Liu whose telephone number is 703-305-8488. The examiner can normally be reached on Mon-Fri.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
